High-speed chase ends with arrest

By M.A. Lewis
news@thefranklinpress.com

A high-speed chase came out to First Baptist Church Saturday night for the annual Habitat for Human shrimp boil. Among the dinners was Madison Hatch, 7, shown left, holding up her trophy for the junior shrimp eating contest. Below, Dionne Bishop reflits the shrimp boat.

MVI to get outdoor research shelter

By Colin McCanles
pressreporter@thefranklinpress.com

A project at Mountain View Intermediate (MVI) School to provide outdoor learning opportunities for children received funding from Macon County commission and the school board on Aug. 9.

MVI teacher Jennifer Love addressed county commission members about the plan to build an environmental science campus on the campus along Porter Creek, where student scientists can explore the schoolyard and learn about the local environment. Dubbed the MVI Environmental Research Project, the outdoor shelter will also provide shade for students to gather information from the schoolyard and riparian area.

It would also be used for storytelling, outdoor art projects and as a gathering place for students for other academic activities. There would be seating for 45 to 50 students, and it would be handicapped accessible so students with special needs could access the facility.

Outdoor learning activities at MVI have been well received by students.

States may get waivers for 'No Child'

By M.A. Lewis
news@thefranklinpress.com

With 2014 looming, states can now ask for a waiver from the requirements of No Child Left Behind, though they will have to adhere to high academic standards.

Melody Barnes, director of the Dominion Policy Council at the White House, and U.S. Education Secretary Arne Duncan announced President Barack Obama’s order Aug. 8.

“Real local food is food grown in your garden,” he said.

When we talk about local foods, Durden says we mostly think of produce, but it also encompasses dairy products and other foods our family hand raised on our farm.

Durden explores the economic promise of local food movement

By Colin McCanles
pressreporter@thefranklinpress.com

Durden invited his audience to local foods? So, just what do we mean when we say the phrase we hear thrown around a lot lately.

“Real, real local food is food grown in our local farms. It's food that is grown right here in the state. It’s food that is fresh and healthy. It's food that is grown by farmers who really love farming in order to stay in it. I think farmers deserve our respect. And they really love farming in order to stay in it. They've got a hard job and they've got to

Learning Processes present-
The essential skill standard agricultural practice be done organically or using meat. Additionally, local food venues make a point to purchase local foods. The local foods movement has grown faster than any movement that I've seen in all phases of reading. If one can't read, they can't learn math science, history, or other subjects. The acquisition of reading skills is vital. Wisconsin's Department of Education during the Governor's Workforce Development the Lindamood Bell program is a national leader in identifying reading disorder, customizing instruction to meet the individual's needs and modifying the environment by creating classrooms where students need the same kind of instruction and can work with their teacher or their therapist.
